## About me

Passionate about creating immersive user experiences, I am a newly exterminated frontend developer who is a quick learner and loves designing and implementing intuitive web interfaces. With expertise in HTML, CSS, and JavaScript, I thrive in turning creative concepts into pixel-perfect, responsive websites. My dedication to clean code and attention to detail ensure seamless functionality across various browsers and devices. Committed to staying up-to-date with the latest industry trends, I continuously explore new technologies and frameworks to enhance user engagement and optimize performance. As a collaborative team player, I enjoy working alongside designers and backend developers to deliver visually stunning and highly functional websites. I take pride in delivering projects on time, meeting client requirements, and exceeding expectations. Ready to take on new challenges, I am excited to contribute my skills and contribute to creating exceptional digital experiences.

---

## Work experience

### Inserve Technology AB

**Nov 2022 — Juni 2023**

Frontend Developer

This included both my practical education and extra work. I mainly delivered value to the customers Macforum and Majblomman, with a total of 102 hours reported to customers. I worked with React, Redux, Sveltekit, UI- libraries (Material-ui and Tailwind).

### Freelance

**Jan 2022 — Jan 2023**

SWAG's website (Street Workout Athletes Gothenburg)

I created a website for an association called SWAG while studying.

### Freelance

**Juni 2022 — Jan 2023**

Movement freedom

I created a website for a personal trainer while studying

---

## Worked with

- HTML
- CSS + CSS libraries Material UI, Mantine, Tailwind
- React.js
- Svelte / Sveltekit

- **Typescript (basics)**

---

## Education

### Frontend developer with UX/UI

September 2021 — Juni 2023

Jensen Education

This education gave me all I needed to be able to continue my learning by start working.

---

## Interests

I've always loved logical and technical challenges, this is why I enjoy things like strategic thinking, problem solving, systems thinking and programming.

I also love being aesthetic and creative, therefore I enjoy activities like singing, playing the guitar, wood carving and creating different sorts of art.

Lastly, I enjoy challenging myself physically and mentally, therefore I enjoy activities like climbing, hiking and various exercises.
